

Start a new journey of success with ENTTEC

About Us:

ENTTEC is the leading Australian manufacturer of lighting controllers and LED solutions. ENTTEC started as a family-owned business that has flourished into an international masterpiece. With offices in Australia, US and the UK, the company continues to grow and expand. ENTTEC has a strong reputation not just for engineering expertise but for fine craftsmanship and technical innovation. ENTTEC is leading the way to the future of LED lighting solutions and lighting controllers.

ENTTEC prides itself on the diversity in the workplace. We believe that working alongside people of different backgrounds, experiences and working style creates a work environment where modern creative concepts can be inspired. When a diverse team working together to reach a shared objective, perfection can be created. An inclusive culture where communication is open and done with sensitivity and integrity is very important to ENTTEC. We operate as a cross-functional team using agile and lean practices to perfect our procedures.

We are on the hunt for a like-minded individual to join our team as a  **Electronics Assistant.**

The opportunity:

As ENTTEC's Electronic Assistant you will be given the opportunity to build and assemble our innovative masterpieces. You will have a willingness to learn and have strong analytical skills and attention to detail. You will identify and resolve problems and participate and work alongside a team who are passionate in the industry's leading technology. Technical opportunities to work with the R&D team may be available for staff who present innovative solutions and ideas. There may also be opportunities to up-skill and work on our machinery including but not limited to- Laser Cutter, SMT, Potting Machine, Wave Machine, Crimping Machine and many more.

About you:

Essential experience:

- Experience working with electronics and circuit boards
- Ability to problem solve and find innovative solutions
- Be able to understand technical manufacturing instructions, drawings and printed designs
- The ability to work unsupervised and to show initiative solutions
- Strong analytical thinking skills

- Strong soldering skills

Desirable:

- Experience in a manufacturing environment
- Qualification in Electronics

Skills

- The ability to work autonomously and show initiative
- High level of interpersonal, written, and verbal communication skills.
- High attention to detail
- A high level of initiative and a proactive nature
- Be adaptable and able to pick up new skills
- A strong sense of pride in work

What you'll do:

- Install units and printed circuit boards following specification
- Find errors, diagnose, repair or/and replace defective units
- Troubleshoot and think of innovative solutions
- Test and program units
- Assist with quality inspection during manufacturing process in accordance with quality requirements (visual inspection, testing)
- Mechanical assembly of final products
- Technical assistance
- Keep working station clean and tidy
- Ensure all tools are maintained to be fully operative

You will be reporting to the Production Team Leader.

Culture and Perks

- Diverse and engaging environment
- A culture of creative freedom and experimentation
- Working with highly skilled and amazing people
- Knowledge sharing and cross-training
- Be part of a supportive and caring team
- Work closely with the general manager

Our Values

- Be ahead of the curve
- Be proactive and seek solutions

- Always innovate and improve
- Commit to excellence in everything we do
- Demonstrate an inclusive environment that embraces differences
